

A An old value wins

Earlier meal = keto

Update meal = vegan

What is the current meal?

Answer **keto**

Right variable · old value

B Conflicting updates

Matched context length

Extra neutral text

Reliable answers

Earlier assignments

Accuracy falls

Conflict—not length alone

Observed across model families

Scale delays—but does not remove—the failure

C Available, not selected

Both candidates remain readable

Current value **vegan**

Old value **keto**

Answer selection

Old value chosen

Targeted late intervention
shifts output toward the current value
