

(a) The answer uses an old value

Question about meal style

old value

earlier choice

“switch to **gluten free** meals”

another variable

learning style

“**discussion** is the method that helps me most”

question

“For my meal style, what is the latest value I chose?”

unrelated conversation

current value

updated choice

“set my meal style to **mediterranean**”

old value mentioned again

near the question

“still thinking about **gluten free** ... for my meal style”

answer: **gluten free** × current value: **mediterranean**

Right variable, outdated value

(b) The answer uses another variable

Question about meal style

old value

earlier choice

“update my preference to **keto**”

another variable

music genre

“change my selection to **hiphop**”

unrelated conversation

current value

updated choice

“change my plan to **gluten free**”

question

“For my meal style, what is the latest value I chose?”

answer: **hiphop** × current value: **gluten free**

A recent value, but the wrong variable
